***Response to Election***

Applicant's election with traverse of both Groups I and III in the reply filed on 8-15-2005 is acknowledged. Applicant should elect only one of the groups even if the election is made with traverse.

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a radio frequency radiation suppressor, classified in class 219, subclass 761.
- II. Claims 11-15, drawn to a method of making a radiation suppressor , classified in class 219, subclass 600.
- III. Claims 16-20, drawn to a frequency radiation suppressor, classified in class 219, subclass 761.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and both Groups I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make a frequency radiation suppressor with or without a metallic connector.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Vincent Pace Reg. No. 31,049 on 7-7-2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
